100YLA Online Series Episode 2: Health and Life Expectancy

Life expectancy in Asia has increased significantly from 1955 to 2020. In many Asian societies, centenarians are still celebrated, but they are no longer a rarity. Society and government policies have not been designed around the expectation that people will live to 100.

The Yuen Lecture Series is going to present you an online conversation series with [Kathleen Cagney](#), Professor of Sociology and Chair of **100 Year Lives in Asia (100YLA)** which will explore the education, career, family, financial security and many other topics to address the changing needs people and their families have as they prepare to live longer lives while facing a COVID-19 future.

Episode 2: Health and Life Expectancy

In Episode 2, Professor Cagney will have a discussion with [Angelique Chan](#) from the Duke-NUS Medical School and [Mark Hayward](#) from the University of Texas at Austin to discuss mortality trends and demography, and how factors like caregiving, education and social engagement impact health and life expectancy. The session will last for an hour.

May 14, 2020 (Thursday)

7:30am | Chicago
1:30pm | London
2:30pm | Paris
6:00pm | Delhi
