## The Global Energy Crunch

As the world ramps up production after nearly two years of COVID stoppages, energy shortages are sweeping countries throughout Asia and the globe.

Energy prices in all areas including gas, coal and petroleum have skyrocketed. The gap between energy supply and demand have resulted in factory closures and begun to affect consumers' daily use. The rapid deterioration has aroused worldwide concern over the post-pandemic economic recovery

Join our panel of energy experts for a discussion related specifically to the energy crisis in India, China, Singapore and the global implications. Newly joined speakers **Dr. Rohit Chandra** from the Indian Institute of Technology Delhi and **Mr. Wong Kim Yin** from Sembcorp Industries Ltd (former CEO of Singapore Power Group) will discuss the market dynamics behind this global phenomenon and countermeasures from countries with **Kevin Mo** from Peking University.
