Big Data, Government Policy and Defeating COVID

In the past two years, different countries have adopted unique strategies in fighting COVID. Mainland China, Hong Kong SAR and other geographies have maintained the “dynamic clearance” approach to resolutely prevent COVID’s continuous spread in communities, while others have started lifting travel and quarantine restrictions.

Despite the different goals and approaches to managing COVID, data plays an important role in the policy-making process. How have countries and organizations been tracking COVID by data visualization and analytics? How has data affected the implementation and adaptation of policy? Please join us to hear our UChicago faculty and panel of experts discuss tracking COVID in Asia and the West, and learn what’s next for Hong Kong.
